General information

Danske eBank authentication token (digipass) is a device intended for identification of users in Danske eBank system, which complies with the highest security requirements and ensures an unlimited number of different passwords.

Creation of the security password (PIN code)

Digipass elements

Model 270

To turn on the digipass by pressing the turn-on button  and subsequently pressing the lock button .

Model 260

To turn on the digipass press the turn-on button .

Creation of the PIN code

Before you use your digipass, you have to create the security password for it.

[Turn on the digipass.](#)

After the words NEW PIN appear on the screen, create and enter a 4-digit PIN code.

After the words PIN CONF appear on the screen, enter the same PIN code once again.

After you successfully created the PIN code, the words NEW PIN CONF will appear on the screen.

Remember the PIN code that you have created. You will have to enter it every time you turn on your digipass..

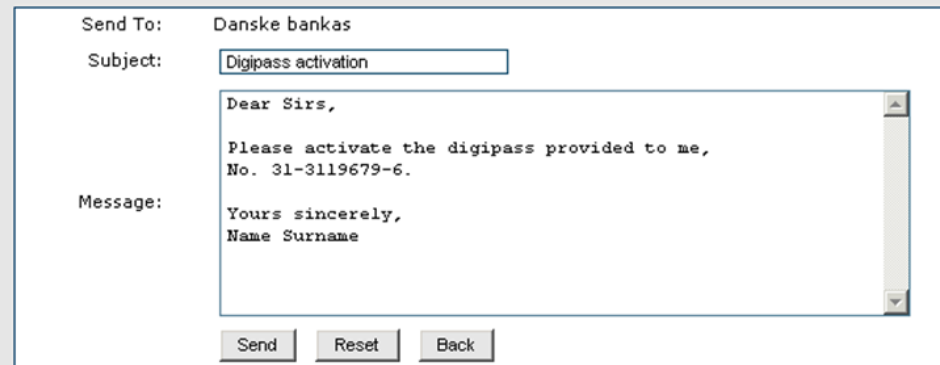

Activation of your digipass at Danske eBank system

Menu bar

Log in to Danske eBank and, having selected from the menu the option „Info / Messages“, click on „New Message“.

The screenshot displays the Danske Bankas eBank system interface. At the top, the logo "Danske Bankas" is visible. On the left, there is a navigation menu with options: Logout, N. Surname, 2010.03.30 10:34:00, Info (expanded), Session Information, Contracts, Loans, Currency Buy/Sell Rates, Official Currency Rates, All Customers Accounts, Lietuvos Bankas, Messages (selected), Messages Search, Accounts, Transactions, Securities, Life insurance and pension, Electronic services, and Settings. The main content area is titled "Messages" and includes links for "Spausdinti" and "Paqalba". Below the title, it states "You have no messages." and features a "New Message" button (highlighted with a red dashed box) and a "Search" button. A "Symbols" section is also present, listing message types: User message (square), Bank message (circle), Read bank message (filled circle), Important bank message that requires reply (open circle), and Read important bank message that requires reply (filled circle).

For more information please call 1636 or visit www.danskebankas.lt

The screenshot shows a web form for sending an email. The 'Send To' field is filled with 'Danske bankas'. The 'Subject' field contains 'Digipass activation'. The 'Message' field contains the following text: 'Dear Sirs, Please activate the digipass provided to me, No. 31-3119679-6. Yours sincerely, Name Surname'. At the bottom of the form are three buttons: 'Send', 'Reset', and 'Back'.

New message

In the newly opened message window:

- Enter “Digipass activation” in the “Subject” field;
- Indicate the following in the “Message” field:
 - your wish to activate your digipass;
 - the number of your digipass (see scheme 1, element No. 3).

After completion of the notification form, click “Send”.

We will activate the digipass within two business days after receiving the request.

The first logging-in to Danske eBank using the digipass

Enter the Password with Number: 12

12:

Enter Response of Authentication token

Challenge: 806213

Response:

Input window

After completion of activation of your digipass, on Danske eBank log-in page instead of the usual window requesting you to enter a password from your password card

you will see a window, in which you will be requested to enter the digipass response.

The image shows three sequential digipass screens. The first screen displays the word "PIN" above a horizontal line with four dashes. The second screen shows a downward-pointing triangle on the left and a horizontal line with six dashes. The third screen shows a downward-pointing triangle on the left and the number "654321".

Enter Response of Authentication token

Response:	<input type="text" value="*****"/>
	<input type="button" value="Sign"/> <input type="button" value="Back"/>

Digipass reply

[Turn on the digipass.](#)

After the word PIN appears on the screen, please enter the 4-digit PIN code which you created at the time of activation of your digipass.

After you have correctly entered the digipass PIN code, 6 dashes will appear on the screen.

Enter the question number provided by Danske eBank system.

After the question number has been entered, the digipass will generate a reply.

Please enter the received digipass reply in Danske eBank system reply field and press the "Enter" button.

Dispose of password card

If you have successfully activated your digipass and logged in to Danske eBank, your password card becomes invalid; please dispose of it safely (e. g. cut it to pieces).
