

Ordering of Danske eBank digipass to be sent by post

After you log in to Danske eBank, select from the menu "Info" → "Messages" and click "New Message".

In the newly opened message window:

1. In the **Subject** field, enter "Digipass ordering";
2. Indicate the following in the **Message** field:
 - your wish to change your password card to a digipass;
 - the address, to which you would like the digipass to be sent (we recommend that you check your postal code at website of Lithuania post <http://www.post.LTL/LTL/?id=316>);
 - your contact telephone number, to which a bank employee can call you in case of any questions;
 - you may also wish to enter other additional information.

Important information

If you represent an organisation or several users of Danske eBank, please remember that a legally valid request may be submitted only by the Danske eBank user having the first signature right.

In your request, please specify for which specific Danske eBank users you want password cards to be changed to digipass.

After you complete the message form, click **Send**.

Send To:

Subject:

Message:

Dear Sirs,

I would like to change my password card to an authentication token (digipass). Please sand the digipass to the following address: Ozo St. 30, LT-07150 Vilnius. In case of any questions, call me at the following number: 8 612 12 345.

Yours sincerely,
Name Surname

3. After you have successfully performed all the steps, you will see a confirmation of sending of the message. Please click **OK**.

We will send the digipass to you within two business days after receiving the request.

You will be charged (from your account) for **Danske eBank** digipass when it is sent out.
